To whom it may concern,

I understand that the FDA is considering removing requirements in the labeling of foods. I would like it clear that I feel that this is NOT in MY best interest as a consumer and as a citizen. I feel that this is only in the interest of the supplier. I would like to be able to make the choice of what foods I buy and use, with the consideration of whether the food has been irradiated.

As a government organization, I it is important for you to represent the needs of all citizens. In this manner, I feel that I would be losing a right to know about the foods I eat and feed my children. I do not feel that this is fair, and urge you to please let me continue to be an aware shopper, and make my own decisions.

Thank you,
Deborah Storchlic
